## Smart products for travelling, at home, and camping

---

Mestic offers a smart, balanced range of products for travelling, at home, and camping. Innovative, specially-developed products based on our many years of experience with campers who want luxury and comfort.

All our products feature a low wattage in order to function at locations with a limited electricity supply. Our handy powerpack ensures you will always have electricity close at hand. Enjoy a cold drink from one of our cool boxes when you make a meal with our all-in-one barbecue, or a wonderful breakfast with fresh coffee from our espresso machine. Create a comfortable environment with the air coolers or electric heater.

All in all, Mestic allows you to enjoy all your home comforts no matter where you are!

Mestic PowerPack MPP-20  
gives you energy!

The Mestic PowerPack ensures you'll never be left without electricity again. The portable battery means that you can use a cool box or other small device wherever you are, without the need for a mains voltage supply. The powerful battery cells supply 250Wh – 20Ah, and a full battery provides 20 hours of electricity. The PowerPack also features 3 USB ports and a USB-C port, meaning that even the latest smartphones can be easily and quickly charged. The integrated digital display allows you to check the battery status and battery life at a glance

KEEP IT COOL

Cool with Mestic boxes, on the road and on location.

Thanks to many years of experience, Mestic has been able to develop a range of cool boxes suitable for any user and application. The cool boxes are available with different cooling systems, from thermo-electric to hybrids or compressors, from cooling to freezing. The cool boxes all have one thing in common: they ensure that your food, drink or medication

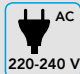

remains cool and fresh wherever you go. Mestic cool boxes come in a stylish black design. Enjoying a summer day out or a trip to the beach? Mestic cool boxes ensure that you'll always have a cold drink close at hand!

COOL

Thermo Electric cool boxes

Cooling capacity:

-  To 20°C below the ambient temperature
-  To 20°C below the ambient temperature

The thermo-electric cool boxes work on electricity and cool to 20°C below the ambient temperature. If the temperature is 25°C at your destination, the temperature in the cool boxes will be 5°C. The ventilator in the lid provides optimum airflow. The top quality insulation ensures that the temperature is maintained for an extended period of time.

The cool boxes can be connected at 230 volts, while the 12-volt plug supplied along with the compact format of the cool boxes make them ideal for taking on your travels.

Thermo-electric cool boxes are the ideal choice for travelling or a day out.

COOLER

Hybrid cool boxes

Cooling capacity:

-  To 20°C below the ambient temperature
-  +10°C to -15°C

The hybrid cool boxes can be used in two different ways. When the cool boxes are connected at 230 volts, they work as compressor cool boxes, giving them cooling capacities of +10 to -15°C.

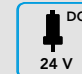

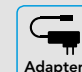

At 230 volts, compressor cool boxes are ideal for holidays to hot countries: the outdoor temperatures have no impact on the cooling capacity.

When hybrid cool boxes are connected at 12 volts, for example, in the car, they work as thermo-electric cool boxes. In that case, they cool to 20°C below the ambient temperature.

COOLEST

Compressor cool boxes

Cooling capacity:

-  +10°C to -18°C
-  +10°C to -18°C
-  +10°C to -18°C

The compressor cool boxes feature the most powerful method of cooling and most resemble the fridge you have at home.

Compressor cool boxes are equipped with a special DC compressor, giving the cool boxes a cooling range of +10 to -18°C at 12 or 24 volts, which the hybrid cool box can only reach at 230 volts.

The major advantage of compressor cool boxes is that the ambient temperature has no impact on the cooling performance. The large cooling area means you can even use these cool boxes as mobile freezers, making sure you can get a cold drink or tasty ice cream wherever you are.

Keep it  
**COOL**  
Mestic

## Compressor cool boxes

By choosing a Mestic compressor cool box, you're choosing for the most efficient way of cooling. The new cool boxes feature a compact stylish design and a capacity up to 35 litres.

The cool boxes are equipped with a special DC compressor, meaning they have a cooling range of +10 °C to -18 °C at 12 or 24 volts. The touch LCD display allows you to easily set your desired cooling temperature. The cool boxes feature LED lighting on the inside along with a separate compartment for temperature-sensitive food. The cool boxes work at 12 volts.

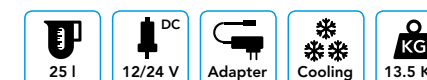

Once at your destination or at home, simply connect these cool boxes to a 230 volt supply with the adapter available separately.

**1502930** Cool box compressor MCC-25 DC

- Technical details
- Compressor cooling system
  - Cooling and freezing from -18 to +10 (DC)
  - Digital display with USB connection
  - Suitable for 1l bottles
  - Suitable for 230V with optional adapter

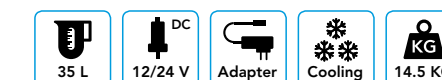

Measurements (lxwxh) 58.5 x 33 x 28 cm

Mestic

KEEP IT COOL

Hybrid cool box

Are you looking for some sun on your holiday? If so, choose the Mestic hybrid cool box with 42-litre capacity. Eight 2-litre bottles or fifteen 1.5-litre bottles can be placed in the upright position. The cool box can be used in two different ways.

**Connecting at 230 volts.**

If you're connecting the cool box at 230 volts, it works as a compressor cool box with a cooling capacity of +10 °C to -15 °C. The compressor cool box has a set cooling range without any influence from the ambient temperature. At 230 volts, this compressor cool box is perfect for holidays to hot

countries such as Italy or Spain; high ambient temperatures have no impact on the cooling capacity of the compressor cool box.

**Connecting at 12 volts.**

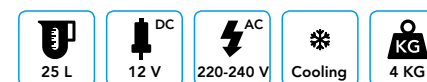

If you connect the hybrid cool box at 12 volts, for example, in the car, it works as a thermo-electric cool box. This cools to 20 °C below the ambient temperature, meaning that whether you're going camping or on your travels, you can always be assured of a cool drink.

**1502910 Thermo-electric MTEC-25 AC/DC**

- Technical details
- Thermo-electric cooling system
  - Cool to 20 degrees below the ambient temperature (DC)
  - Eco-setting for lower electricity consumption
  - Integrated 230V converter
  - Energy class A++

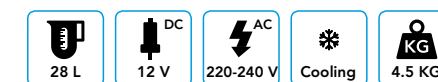

Measurements (lxwxh) 39 x 30 x 40.7 cm

**1502920 Thermo-electric MTEC-28 AC/DC**

- Thermo-electric cooling system
  - Cool to 20 degrees below the ambient temperature (DC)
  - Eco-setting for lower electricity consumption
  - Integrated 230V converter
  - Energy class A++

Measurements (lxwxh) 39 x 30 x 45.7 cm

## Mestic fan

The MCF-80 is convenient fan that provides cooling and light. This compact, battery-powered fan can be used as a table model, or can be hung up thanks to the useful wall bracket. Both the fan and the integrated LED lighting have 2 settings. On full battery, the fan provides 7 hours of cooling and 12 hours of light. The fan blades are made of flexible rubber. This makes them safe for children and animals. The MCF-80 is easy to charge with the micro USB cable supplied.

### 1502880 Mestic fan battery MCF-80

Technical details

- Compact battery-powered ventilator
- Integrated LED lighting (2 settings)
- Touch protection thanks to soft blades
- Can be used in a standing or hanging position
- Charged using a micro USB port

Measurements (lxwxh) 22 x 21 x 12.5 cm

## Mestic air cooler

The new, compact air cooler by Mestic ensures you always have a cooler at hand. The air cooler cools and humidity the surrounding area, providing a refreshing breeze. The way it works is simple: fill the 550ml water tank, turn the air fan

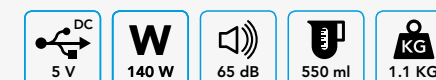

on, and select one of the three ventilation settings. The hot air is drawn into the back of the device, passes through the cooling water evaporation filter, after which the cool air at the front is emitted and distributed.

### 1503020 Mestic air cooler MAC-120

Technical details

- Air cooler provides a breath of fresh air
- Water tank capacity 550ml
- 3 ventilation settings
- 170 m<sup>3</sup> per hour of air displacement
- Integrated LED lighting (6 colours)

Measurements (lxwxh) 19 x 16 x 15.3 cm

The  
**HEAT**  
IS ON  
Mestic

**CREATE YOUR IDEAL ENVIRONMENT**

The ceramic heater feature a thermostat providing a consistent, comfortable temperature. Turn the thermostat to '0' and the integrated fan ensures a cool, fresh breeze on hot days.

**COMFORT**

The wide angle oscillation position ensures even heat distribution. Combine this function with the integrated ventilator and enjoy a comfortable temperature throughout the entire room.

**SAFETY FIRST!**

All heaters are equipped with a fall protection system anti touch protection. This means that the stove will automatically switch off if it falls over or is repositioned.

Create your ideal climate with Mestic heater

Every camper knows that some evenings can get chilly. Do you want to enjoy your evenings for longer, without getting cold? With an electric heater, you'll be warm from now on!

All heaters feature several power settings, allowing you to select the setting that matches the electricity supply at your campsite.

The heaters come with a range of heating techniques. We've provided an overview below:

**CERAMIC HEATER**

The ceramic heater comes with a powerful heating element, meaning this stove is small, compact, and perfect for your travels. The integrated thermostat ensures a consistent temperature. Use the oscillation stand and fan for optimal heat distribution in the room.

**CARBON HEATER**

The carbon stove is equipped with ceramic heating pipes that provide light and heat. A carbon element has limited heat loss due to wind, meaning these heaters are suitable for both open and enclosed spaces. The large heating surface provides a comfortable sensation of warmth.

**QUARTZ HEATER**

A quartz stove is the most economic choice. Two heating elements generate light and heat, while the reflector on the back ensures an even heat emission. A quartz element is sensitive to wind, meaning heat dissipates more quickly. This makes this heater suitable for enclosed spaces.

**1502980 Mestic ceramic heater MKK-150**

## GRILL ON!

With our all-in-one BBQ's

When you think of outdoors, you think of barbecues. The Mestic MB-100 is the ideal barbecue for at home and holidays. With a cooking surface of 31 cm, you can make your favourite dishes. The big brother, the MB-300, has a cooking surface of 46 cm for even more enjoyment while cooking. This barbecue can be used as a table model, or standing when using the feet. The barbecue gives you the option of roasting, grilling and cooking thanks to the baking plate and grill. Both barbecues can be connected to any gas supply, featuring piezo ignitions and an integrated grease draining system, and are easy to clean. Experience unforgettable evenings with a Mestic barbecue.

## Mestic Espresso machine

The espresso machine allows you to enjoy a cup of coffee, just like you have at home. No more messing around with filters and ground coffee. This powerful, modern machine is unique thanks to the 950-watt capacity, making the espresso machine ideal for taking on a boat or going camping. The adjustable coffee volume allows you to make coffee of your desired strength and flavour. Did you enjoy it? The machine retains the settings for next time. Fill the water tank, position the cup, and enjoy!

# Share and enjoy a cup of fresh coffee together

Make coffee just like at home, no matter where you are, with the Mestic coffee makers. The coffee makers are light, compact and have a modern design. From 1 to 10 cups, filter coffee or cups, Mestic has the right coffee maker for every coffee connoisseur. The coffee makers are available from 450-watt models upwards.

## Enjoy freshly washed clothes, wherever you go!

Mestic washing machines ensure that you no longer have to use washing machines on the campsite. There are 4 compact models, and the travel washing machine even fits into your hand luggage! The travel washing machine can be connected via USB and all you have to do is add your washing and let the machine do the rest! The MW-80 makes doing small daily washing chores easy. This hand washing machine has a 2.0 kg washing and centrifuge capacity. Prefer to let the machine do all the work?

The MW-100 is an energy and water-saving machine. Add water and detergent, and start your laundry! Lots of washing to do? The MW-120 features a motor that ensures you can manage up to 3.5 kg load (dry wash). Fill the drum with the laundry, water and detergent, and the machine does the rest. This machine even has a centrifuge function that makes the laundry towel-dry in no time at all.

# let's start cleaning at home, your caravan, motorhome or boat

Cleaning your car, caravan or camper was never so easy. The compact, lightweight bagless vacuum cleaners by Mestic provide ultimate convenience on the campsite and on the road. Thanks to the various nozzles, even hard-to-reach areas are dust-free. All vacuum cleaners feature a dust container and a washable filter. The MS-80 works on 12 volts, meaning it's the ideal choice for when you're traveling. The MS-120 is a Cyclone vacuum cleaner and works on 230 volts. This light vacuum cleaner

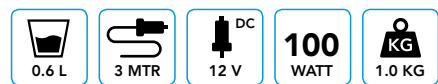

has a powerful suction force and retains it, even if the collection bin becomes full. The MS-140 has the same advantages as the Cyclone but is wireless thanks to the chargeable battery. This way, you are not limited by the length of the cable. The rotating brushes mean it has a very strong suction force. When the battery indicator says that the vacuum cleaner is nearly empty, simply charge it in the wall bracket. Nice and tidy.
